CUBICLE TRACKING INSTALLATION INSTRUCTIONS

5000 SERIES – DROP CEILING GRID INSTALLATION

The tools and materials that are required to install cubicle track will vary depending upon the ceiling type. Diamond Drapery does not provide the fasteners or the tools that are required to install cubicle track. Diamond Drapery does not assume liability on any installation method. The techniques listed here are merely industry recommendations.

1. Place the privacy track on the floor. Lay out the configurations to ensure that the track is positioned exactly where it is desired.

2. Begin on one end of the track; and mark the holes on the ceiling. Repeat this process on the track as well. Note: track should be secured at 24”- 30” intervals beginning on one end of the track.

3. Decide which end of the track will receive the end stop with pull-out.

4. Pre-drill the track. Anchor track via a 2” #8 self tapping screw hex head or pan head recommended. Track will be anchored directly to the drop ceiling grid.

5. If the track is spliced, check to ensure that there are no obstructions. Then place the track splice over one end of the track and secure via the steps listed above. Slide the other side of the track into the splice and secure with a fastener. This will ensure that the carriers will not bind at this location.

6. Make sure that both ends of the tracks and the end stops are secured to the ceiling.

7. Remove the pull-out and begin assembly (refer to assembly instructions).

5000 SERIES – DROP CEILING GRID WITH CHANNEL BACKING INSTALLATION

The tools and materials that are required to install cubicle track will vary depending upon the ceiling type. Diamond Drapery does not provide the fasteners or the tools that are required to install cubicle track. Diamond Drapery does not assume liability on any installation method. The techniques listed here are merely industry recommendations.

1. Place the privacy track on the floor. Lay out the configurations to ensure that the track is positioned exactly where it is desired.

2. Begin on one end of the track; and mark the holes on the ceiling. Repeat this process on the track as well. Note: track should be secured at 24” on center intervals beginning on one end of the track.

3. Decide which end of the track will receive the end stop with pull-out.

4. Pre-drill the track.

5. Decide where the 1 ½” channel will be laid flat directly above the track.

6. Attach 12 gauge hangar wires at 48” intervals on center.

7. Secure hangar wire to the 1 ½” channel backing with three tight turns. Turns should be completed within 1 ½”.

8. Anchor track via a 2 ½” #8 self tapping screw hex head or pan head recommended. Track will be anchored directly to the 1 ½” channel. Track must be secured at 24” intervals on center to the 1 ½” channel.

9. If the track is spliced, check to ensure that there are no obstructions. Then place the track splice over one end of the track and secure via the steps listed above. Slide the other side of the track into the splice and secure with a fastener. This will ensure that the carriers will not bind at this location.

10. Make sure that both ends of the tracks and the end stops are secured to the ceiling.

11. Remove the pull-out and begin assembly (refer to assembly instructions).

5000 SERIES – SHEETROCK (DRYWALL) WALL INSTALLATION

The tools and materials that are required to install drapery track will vary depending upon the wall type. Diamond Drapery does not provide the fasteners or the tools that are required to install drapery track. Diamond Drapery does not assume liability on any installation method. The techniques listed here are merely industry recommendations.

1. Place the drapery track on the floor. Lay out the configurations to ensure that the track is positioned exactly where it is desired.

2. Begin on one end of the track; and mark the holes on the wall. Repeat this process on the track as well. Note: track should be secured at 24”-30” intervals beginning on one end of the track.

3. Pre-drill the wall and anchor 2x2 Wall Brackets (part #5000-31) via a 3” hex head bolt and wings. Toggle will be 1/8” in diameter. Slotted hex head or Robertson head is recommended.

4. Pre-drill the track. Anchor track via a 1/2” #8 self tapping screw hex head or pan head recommended.

5. If the track is spliced, check to ensure that there are no obstructions. Then place the track splice over one end of the track and secure via the steps listed above. Slide the other side of the track into the splice and secure with a fastener. This will ensure that the carriers will not bind at this location.

6. Make sure that both ends of the tracks and the end stops are secured to the wall.
